Alabama Traffic Crash Facts

Read about Alabama's Strategic Highway Safety Plan (SHSP) on page 38.

ACKNOWLEDGEMENTS

This report was assembled from data provided by the Alabama Department of Public Safety. Each crash record, whether completed by a local police officer or a member of the Alabama Highway Patrol, was sent to Montgomery and entered into a centralized database maintained by the Department of Public Safety. This project was supported by Subgrant No. 04-SP-AL-003 awarded by the Alabama Department of Economic and Community Affairs (ADECA/LETS) and the National Highway Traffic Safety Administration. The data summaries were provided by the Alabama Department of Transportation, who also provided partial funding for this effort along with the Alabama Department of Economic and Community Affairs—Traffic Safety Section.

The report itself was created by personnel at the University of Alabama CARE Research & Development Laboratory and Alabama Department of Transportation safety personnel. Statistical information was augmented by the Critical Analysis Reporting Environment (CARE), a national award-winning computer system developed in Alabama that is now being employed to process several state and federal traffic crash/incident databases. Additional summaries of information as well are available on the following websites:

<http://care.cs.ua.edu>
<http://safehomealabama.gov>

These sites support the on-line generation of summary information from the Alabama crash database. For more information on this capability or additional crash information contact:

FAX: (334) 242-0937

STATE OF ALABAMA

Citizens of Alabama:

It is my pleasure to present to you the 2006 version of the Alabama Crash Facts. The issue of traffic safety is a major concern to me and to every agency involved in both state and local government. Because of the importance of traffic safety, the state of Alabama puts a large emphasis on the issues surrounding it. The Crash Facts book provides insight to all citizens on the types of crashes occurring, the causes of those crashes and the unfortunate consequences of them. Within this book you can find information about the contributing circumstances surrounding the crashes and the impact they have on your county and city.

The traffic safety community within Alabama is one that works together for the improved safety of the state. I would like to encourage all governmental and volunteer organizations to become involved in traffic safety in some way. The combined efforts of the various groups from across the state are helping to save lives and reduce the suffering that results from motor vehicle collisions in Alabama. We all need to do our part.

A number of agencies contribute to the traffic safety effort in some way. This includes police, engineers, emergency medical technicians, public health professionals, educators, researchers, advocate groups, court officials, legislators and many, many others. We thank each and every one of them for the many programs and activities that have produced the significant reduction in the fatality rate that we have experienced over the past decade. Without the efforts of all of these groups, we would not be where we are today in terms of traffic safety.

I thank you for your commitment to traffic safety and the efforts that are being made in the state. By simply taking the time to review this publication, you are demonstrating your interest and concern in reducing the tragic loss that comes from just one fatal or serious injury crash. I encourage you to renew your commitment and efforts to make Alabama's roads safer.

Sincerely,

A handwritten signature in black ink that reads "Bob Riley". The signature is written in a cursive, flowing style.

Bob Riley
Governor of the State of Alabama

Quick Facts

	The 2006 Toll	2006	vs	2005
Persons Killed	1,208	up		5.2%
Persons Injured	43,028	down		2.6%
Reported Crashes	139,781	down		2.9%
Miles Traveled	60,394,000,000	up		1.2%

- There were 1,208 people killed in 1,074 fatal crashes.
- One traffic crash was reported every 225 seconds.
- One person was injured in a traffic crash every 12 minutes and 12 seconds.
- One person was killed in a traffic crash every 7 hours and 15 minutes.
- Most Alabama crashes (71.5%) occurred in urban areas, but most fatalities (68.9%) occurred in rural areas.
- For each person killed, there were 35.6 injured.
- Of all drivers involved in fatal crashes, 10.2% were age 19 or under, and 24.8% were under 25 years of age.
- Of all fatal crashes, 41.6% occurred at night.
- The 2006 pedestrian death toll was 81.
- There were 105 fatalities among motorcycle or moped riders.
- Bicyclists accounted for 9 fatalities.
- For adults who are injured in crashes while in the front seat of a vehicle, the probability of being killed is 9.37 times higher for those not wearing safety belts.

Based on 2006 data, if you are a typical driver in Alabama, there is a 52.60% probability that you will be involved in an injury or fatal crash while driving an automobile in your lifetime.

Alabama's Strategic Highway Safety Plan

Preparation and Implementation of the SHSP

There are about 145,000 traffic crashes in a typical year in Alabama, resulting in about 1,100 fatalities and 45,000 injuries. This is a staggering toll and reflects the national picture—40,000 motorists die annually and more than three million are injured on the nation's roadways.

The United States Department of Transportation and the American Association of State Highway and Transportation Officials (AASHTO) are determined to improve safety on our nation's highways. USDOT made safety its top priority and adopted aggressive goals for reducing fatalities and injuries from traffic crashes. In 2003, AASHTO developed a Strategic Highway Safety Plan that contains 22 emphasis areas and 92 separate safety strategies that are intended to save 7,000–8,000 lives per year. AASHTO asked state departments of transportation to create their own safety plans, and to begin implementing countermeasures in one or more of the 22 emphasis areas in the AASHTO plan.

Following AASHTO's lead, the Alabama Department of Transportation (ALDOT) engaged the University Transportation Center for Alabama (UTCA) to prepare a Comprehensive Highway Safety Plan (CHSP) to reduce fatalities on Alabama Highways. UTCA led a group of 100 volunteers—from both the public and private sectors—in shaping this plan, which was completed in late 2004. The volunteers examined fatal crash data and selected five emphasis areas that they felt would provide the greatest traffic safety benefits (listed in alphabetical order): Emergency Medical Service, Legislation, Older and At-Risk Drivers, Risky Driving, and Run-Off-Road crashes.

In 2005 Congress enacted SAFETEA—the Safe Accountable Transportation Equity Act—a Legacy for Users (SAFETEA-LU). It required that each state

develop a Strategic Highway Safety Plan (SHSP), and it stipulated multiple requirements and considerations for SHSPs. ALDOT engaged UTCA again, this time to: (1) refine the CHSP into the SHSP while meeting all requirements in the legislation and (2) develop implementation plans for the five emphasis areas in the SHSP. UTCA completed the SHSP (UTCA Report 06408) using groups of volunteers, the non-public and private sector, to shape the five emphasis area plans. The names of these volunteers are listed in Appendix A of this report. The completed Alabama SHSP was signed by the Governor and seven State and Federal agency Directors/Administrators on September 30, 2006. It was consequently approved by the Federal Highway Administration on December 4, 2006.

The SHSP Implementation Plan (the document) was produced by UTCA and the same public/private sector volunteers that produced the SHSP. For each of the five key safety emphasis areas, subject area experts and agency managers identified the most important elements of each emphasis area, developed lists of the best countermeasures, prepared cost estimates, and estimated time schedules. Each group worked through the fall of 2006 and early months of 2007 to prepare implementation plans. Chapters 2 through 6 of this report contain the five action plans developed through this process.

The Alabama Traffic Crash Situation Warrants the SHSP

The 2005 *Alabama Traffic Crash Facts* booklet documented that 1,134 people were killed and 44,158 were injured in 143,994 traffic crashes in Alabama in 2005. This amounted to one person being killed in a traffic crash every 7 hours and 43 minutes. The booklet also noted that a typical driver in Alabama has a 54.1% probability of being involved in an injury or fatal crash while driving during his or her lifetime.

2006 ALABAMA TRAFFIC CRASH FACTS

Table 1-1 shows additional Alabama crash statistics that were documented in the SHSP. Over the past decade, there were 1.39 million vehicle crashes, accounting for 457,163 injuries and 10,862 fatalities. To put this into perspective, there were about twice as many traffic crash injuries over the past ten years as there were people living in the Birmingham metropolitan area. Over the same period, the fatality total was about the same as the current population of Leeds, Alabama. In other words, everyone in Leeds died and everyone in metropolitan Birmingham was injured twice in traffic crashes during the past decade. These are unacceptably large numbers.

state's fatality rate has consistently been above the national average. These two facts and the associated pain and suffering by Alabama's citizens warrant a major, coordinated campaign to reduce roadway carnage. This SHPS Action Plan was created for such a purpose.

Another major conclusion can be drawn from Table 1-1. Since 1979, the Alabama fatality rate has been as much as 36 percent above the national average, and averaged 25 percent above the national average for the past five years.

These example statistics point out that the traffic crashes, injuries, and fatalities in Alabama have been significant over the last decade. Furthermore, the
